Up to 5 people on mic for interviews

Individual coaching

Public speaking, school & business presentations

Encouraging effective communication in kids, teens and adults

Self expression, public speaking, interviewing, customer service & more - we offer coaching and workshops that assist kids through adults with improving communication skills that can change their daily lives.

Anyone can benefit from a boost in their communication skills. Whether you're in business for yourself, or moving up the company ladder, it can't hurt to have some digital media skills in your tool belt. Learn effective ways to get your message across to teachers, students, team members, colleagues, bosses, employees, family members, friends, social media followers, and more.

Workshops and coaching are available for audio and video skills like podcasting, and how to easily create professional videos. Teens and adults can brush up on communication skills they don't normally use on their mobile devices - such as public speaking, interviewing for a job or college, and interacting with customers.

“Everyone should have a voice.” ~ Jennifer Smart

For kids and teens 7-18, we offer a variety of workshops and camps where they get to practice some reading and writing skills, amp up their public speaking, and increase their self esteem, while learning valuable digital media skills like podcasting, video production, how to conduct interviews, hosting their own radio show and more.

COMMUNITY RADIO ~ 101.7 FM KJNi-LP

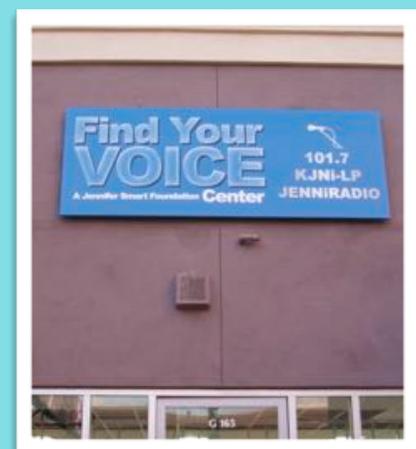

We run your local radio station, with family-friendly music & entertainment (through the JENNiRADIO format) & messages about local events and businesses.

VISIT OUR FIND YOUR VOICE CENTER STUDIOS

Operated by the nonprofit Jennifer Smart Foundation, our studios include audio & video production facilities available for various projects. Tours are available by appointment. Visit our web site for more information on our workshops & other programs. You may also reach us by email or phone. We're happy to answer your questions and discuss how we might assist you with your communication needs.
